Common Interview Pre-Questions

What kind of position(s) are you interested in exploring?
I'm currently interesting in exploring both full-time (salaried) remote opportunities as well as consulting opportunities with new clients.

Why have you expressed interest in this position?
Something about your company and the role you're recruiting for interested me!

What value can you deliver to our team?
Having both led marketing communications in-house and helped a variety of clients achieve their marketing goals, I've developed a broad skillset in marketing communications and good insights into what works for creating sustainable inbound-led growth strategies founded up quality content marketing and thought leadership.

Do you see yourself more as a 'doer' or a 'thinker'?
I'm looking for a role that offers opportunity to get involved in both the strategy and execution aspects of a company's marketing team.

I Also Sometimes Get Asked

Are you a "native English speaker"?
Yes.
What are your salary expectations?
I'd be happy to share those directly.
